ABSTRACT:

PROBLEM TO BE SOLVED: To provide a game machine constituted so as to be capable of the automatic insertion of medals as well as the manual insertion of medals and a game machine with an automatic medal dispenser capable of the automatic insertion of medals and eliminating the inconvenience of inserting medals.

SOLUTION: In a game machine in which games are played by inserting medals into a medal insertion slot with the medals as media, a manual medal insertion slot 6 to insert medals manually into is provided at the front surface of the game machine 1. Then, the second at least one medal insertion slot 8 or more except the manual medal insertion slot 6 are provided for the game machine 1. An automatic medal dispenser 14 is connected to the second medal insertion slot 8.
